**Re: Animal Derivatives (BSE/TSE)**

**Product Name/Item No.**

**DYNAFLEX™ G2711-1000-00 / EM1001609610**

Dear Valued Customer,

This correspondence is in response to your request for information concerning the potential for the Avient Corporation (formerly PolyOne Corporation) product(s) identified above to contain ingredient materials associated with Bovine Spongiform Encephalopathy (BSE or “Mad Cow Disease”), Transmittable Spongiform Encephalopathy (TSE), or otherwise contain substances that are animal derived.

The product(s) listed above does contain a tallow derived substance. The tallow derived raw material used in the manufacture of our product is in compliance with the Note for guidance on minimizing the risk of transmitting animal spongiform encephalopathy agents via human and veterinary medicinal products (EMA/410/01 rev.3) because the processing exceeds the following condition from section 6.4 of the note: trans-esterification or hydrolysis at not less than 200 °C for not less than 20 minutes under pressure (glycerol, fatty acids and fatty acid esters production), therefore presents minimal or no risk of transmitting BSE/TSE. Please note we do not routinely test for these materials. Our information is based on data provided by our suppliers.

The information submitted is valid as of the date of this letter. Avient makes no representations or warranties as to the accuracy of the information contained or referenced herein as of any other date. If you have any questions concerning this matter or if we can be of further assistance, please do not hesitate to contact us. Please contact your Avient Sales Representative should you need additional GLS Thermoplastic Elastomer product support.

This document has been prepared by the Avient Global Product Stewardship group. It has been transmitted electronically and is valid without a signature.

Sincerely,

Avient Global Product Stewardship
