Re: Presence of Substances - Allergens

Product Name/Number

DYNAFLEX™ G2711-1000-00 / EM1001609610

Dear Valued Customer,

Based on the information provided to Avient Corporation (formerly PolyOne Corporation) by its raw material suppliers and our formulation reviews, we have found that the Avient product(s) listed do not contain any known sources of the following **Allergens**:

Substance	Substance
Milk	Seasame
Egg	Mustard
Fish	Celery
Crustacean shellfish	Lupine
Molluscs	Lactose
Tree nuts (e.g., almond, walnut, pecan...)	Sulfites
Peanuts	Soybeans / soya-derivatives ¹
Cereals (e.g., wheat, barley, rye, oats, spelt, triticale and kamut)	

¹One raw material supplier states that their facility processes highly refined soybean based materials; therefore, trace amounts of soy may be present. No soy protein is used in their manufacturing processes and none is used in their facility.

Additionally, Avient does not intentionally add or use these substances in the manufacturing process of this product(s). The absence has not been checked by tests. The investigation on those substances does not belong to our quality and production controls. The fact that the above listings of substances are to all intents and purposes absent from these product(s) does not, of course, absolutely exclude that toxicologically and/or regulatorily irrelevant extremely low trace levels of these substances may be unintentionally present.

This declaration does not waive the responsibility of the user who must check whether the end products are appropriate for the specific intended use.

The information submitted is valid as of the date of this letter. Avient makes no representations or warranties as to the accuracy of the information contained or referenced herein as of any other date. If you have any questions concerning this matter or if we can be of further assistance, please do not hesitate to contact us. Please contact

your Avient Corporation Sales Representative should you need additional GLS Thermoplastic Elastomer product support.
